

EXPORT GUIDE

Packaging & Labeling Guide

Correct packaging protects product quality in transit; correct labeling keeps your shipment moving through customs without delay. Here's what we follow as standard, and what we can customize per order.

Format	Typical Use
25kg PP Woven Bags	Standard bulk packaging for spices, pulses and grains
50kg PP / Jute Bags	High-volume bulk shipments of rice and pulses
Jumbo Bags (500–1000kg)	Bulk loading for large-volume industrial buyers
Vacuum-Sealed Cartons	Premium packaging for dry fruits and nuts, extends shelf life
Retail Pouches (100g–1kg)	Private-label and retail-ready packaging

Standard Label Contents

Unless a private-label design is supplied, export cartons and bags are labeled with: product name and grade, net weight, country of origin, batch/lot number, manufacturing and expiry dates, storage instructions, and our FSSAI license number. Private-label buyers can supply their own artwork — we'll match it to the packaging format you need.
